

Medicare Part B Step Therapy

PART B STEP THERAPY CRITERIA FOR APPROVAL

The requested Part B medication will be approved when BOTH of the following are met:

1. ONE of the following:
 - A. There is an applicable national coverage determination (NCD) or local coverage determination (LCD) from the Medicare Administrative Contractor (MAC) for the jurisdiction and the patient meets all of the requirements listed within the NCD or LCD
OR
 - B. There is NOT an applicable NCD or LCD and the requested medication is being used for an FDA approved indication or in accordance with a CMS supported compendia (i.e., NCCN, Clinical Pharmacology, Lexicomp Lexi-Drugs, Merative Micromedex, & AHFS-DI) or published peer-reviewed literature

AND

2. ONE of the following:
 - A. Information has been provided that indicates the patient has been treated with the requested medication in the past 365 days
OR
 - B. There is documentation that the patient has had an ineffective treatment response to the active ingredient(s) of ALL* preferred medications supported for the diagnosis
OR
 - C. The patient has a documented intolerance, hypersensitivity, or FDA labeled contraindication to the active ingredient(s) of ALL preferred medications supported for the diagnosis
OR
 - D. The prescriber has submitted documentation indicating ALL preferred medications supported for the diagnosis are likely to be ineffective or are likely to cause an adverse reaction or other harm to the patient

Length of Approval: See Table 1 below

*Unless otherwise noted in the preferred medications column of Table 1

NOTES:

- Preferred medication is not required if the indication is not shared by the non-preferred medication in supported compendia or clinical literature.
- Preferred medications may require prior review under Medicare Part D or Medicare Part B. Medicare Part D preferred medications will not be required for Medical Only members.
- Length of approval may be shorter due to provider network participation status.
- Coverage of one Medicare Part B Step Therapy medication could equate to multiple medication authorizations when they share the same Medicare Part B Step Therapy criteria.
